Index of subjects

AEI EM7 electron microscope, 47
Alkaline earths, 237
Aluminium foil, measurement of thickness, 149
Amnion, 233
Araldite, 161
Array processor, 85
Astigmatism correction, 47
Automatic astigmatism correction, 185
Automatic focusing, 93, 185
Autoradiography, 209, 271

Balzers specimen table, for freezing procedures, 227
Beam spreading, 119
Bone, embedding in GMA, 139
Brain artery, 311

Cartilage embedding in GMA, 139
Cell studies
—behaviour, 265
—cytochemistry, 209
—morphology, 311
Cluster resolution, 175
Coincidence techiques, 119
Computer control, 39, 185, 321 (see under *Image*)
Contrast enhancement, 301
Correlation averaging, 127
Correlative microscopy, a method, 271
Crystal distortions, 127

Data compression, 47
Detection quantum efficiency, 17
Digital
—framestore, 17
—filtering, 29, 201
—images, 39
—processing, 69
—scan, 61, 105
Dynamical electron calculations, 293

Electron beam induced radiation damage, 223
Electron energy loss, 119
Electron image recording, 17
Electron microprobe standards, 223
Electron microscopy, 3, 271, 301,
Elemental localization, 237
Endogenous fluorochromes, within a nerve fibre, 277
Epon, 161

Ferritin, in point projection microscopy, 259
Fast Fourier Transfer, 321
Focusing, 93, 185
Foetal myocardium, 301
Framestore, 3, 17, 29, 39, 61, 69, 185
Freeze-fracture procedures, 227
Freeze-substitution, 209

Gylcol methacrylate, embedding of, 139, 287
Gripping-mount, 223

High Resolution Electron Microscopy on-line image processing, 321
Histochemistry, 139

Image (computer controlled)
—processing 3, 29, 39, 61, 69, 85, 185, 201, 321
—analysis, 175
—acquisition, 61
—converter, 17
—calculations, 39
—focusing, 47
—display, 69
—simulation, 69
Intercellular network, 287
Interfacing, 69

Kalman filter, 29
Karhunen–Loeve transform, 47

Laser beam excited material, 277
Lattice straightening, 201
Lattice synthesis, 201
Leucocytes, for SEM observation, 307
Light microscopy, 271
—staining, 139
—television system for point counting, 165
Lithium borate glass, 223
Low-dose imaging, 201

Microanalysis, 237
Microprocessor, 39, 61
Morphometry, 165
Multiple image integration, 201
Muscle cells, 311

Neonatal cartilage, 287
Nerve fibre excitation, by laser beam, 277
Noise enhancement, 201
Nucleus alignment, 311

On-line computer techniques, 3, 39, 93, 119, 185, 321,
Optical sections, recording of, 265

Perfusion fixation, 301
Photodiode arrays, RP3
Plastic embedding, 161, 271
Point counting, 165
Point projection microscopy, 259
Preservation of ultrastructure and antigenicity RP5
Proteins, regular, 127

Radiation damage, induced by electron beam, 223
Real space computation, 293
Real time processing, 47
Resolution assessment, 127, 321

Scanning Auger Microscope (SAM), 105
Scanning Transmission Electron Microscopy
—data acquisition, 61

Perfusion fixation, 301
Photodiode arrays, RP3
Plastic embedding, 161, 271
Point counting, 165
Point projection microscopy, 259
Preservation of ultrastructure and antigenicity RP5
Proteins, regular, 127

Radiation damage, induced by electron beam, 223
Real space computation, 293
Real time processing, 47
Resolution assessment, 127, 321

Scanning Auger Microscope (SAM), 105
Scanning Transmission Electron Microscopy
—data acquisition, 61

—detector, RP1
—multiple signals in, 47
Secondary ion mass spectrometry (SIMS), 237
Section preparation, 271
Section staining, 301
Signal enhancement, 201
Spectroscopy, 119
Symmetry assessment, 127

Tannic acid, 301
Time lapse-cinemicroscopy, 265
Tissue
—thyroid, 175
—multilaminous, 233
—biological, 233
—cartilage, 139, 287
—bone, 139
Thyroid, tissue for cell counting, 175
Topographical analysis in the SEM, 93
Trace elements, 237
Television systems, 17, 165
Transmission Electron Microscopy
—measurement of foil thickness, 149
—double-tilt stage, 155

Ultrastructure, 209, RP5

X-ray microanalysis, 209, 223
